Re: COVID-19 Prevention and Protection

### COVID Count

ACTIVE cases	
Residents	Staff
4	10+5

“+5” refers to a non-staff provider

RECOVERED cases	
Residents	Staff
29	51+9

“+8” refers to a non-staff provider

This morning we learned of one employee and one outside provider who have tested positive. We have one employee and outside provider who are recovered as of today so you will see recovered cases go up and active cases stay the same from yesterday’s memo. The move from active to recovered will repeat over the next few days as the initial wave of positive cases is nearing the end of the quarantine period.

Today I am remembering where we were a year ago. On this day last year, Harbors’ residents and staff who elected to receive the newly available COVID vaccine were dealing with sore arms after having received their first dose the day before. Someone else is likely to remember how many doses were administered that day but 130 comes to mind. Certainly not every eligible employee or Harbors’ resident. At this point last year, IL residents were not eligible to participate in that first vaccine clinic and no one in the general public was either.

We have come a long way in the last year! I have hope that we will cover just as much ground or more in the next year.

Wishing you and your loved ones a very happy and healthy start to the new year!
